

BIO DATA OF DR. ABHAY BANG

- 1) **Name** : Dr. Abhay Bang
- 2) **Date of Birth** : 23rd September 1950
- 3) **Address** : SEARCH, PO & DIST : Gadchiroli, (Maharashtra) 442 605, INDIA
Phone : 91-7138-255407 Fax : 91-7138-255411 E-mail : search.gad@gmail.com
- 4) **Current Position** : Director, SEARCH (Society for Education, Action and
Research in Community Health)
- 5) **Educational Qualifications** :

M.B.B.S. (1972) Nagpur University, India

M.D. (Medicine) (1977) Nagpur University, India

M.P.H. (1984) Johns Hopkins University, U.S.A.

- 6) **Academic Achievements** :

First Position in University, M.B.B.S. and M.D.

Three Gold Medals in M.B.B.S.

First in All India Competition for M.D. Selection at Postgraduate Institute, Chandigarh (1974)

M.P.H. at the School of Public Health, Johns Hopkins University, Baltimore (1984) with 3.96/4 (99%) grade point average.

- 7) **Work** :

Dr. Abhay Bang grew up in the Sevagram Ashram of Mahatma Gandhi. He was inspired by the social ideals, and trained in India (MD) and at the Johns Hopkins School of Public Health, (MPH). He was a top notcher in the University and won 3 Gold Medals. Along with his wife Dr. Rani Bang, he founded the voluntary organization, SEARCH, (Society for Education, Action and Research in Community Health) 17 years ago in one of the most underdeveloped districts, Gadchiroli, in the state of Maharashtra in India, where they have been working with the people in 150 villages to provide community-based health care and conduct research. They have developed village health care program which has now become a nationally and internationally famous model. It has influenced the health policy in India and globally at least thrice. They first brought to the notice of the world that rural women had a large hidden burden of gynecological diseases. They showed how the pneumonia in children can be managed in villages, and recently, how newborn care can be delivered in villages. Their work has reduced the IMR to 30 in this area.

The Home-based Newborn Care approach developed by him has been replicated in several countries and has now become a national program of the Govt. of India. 800,000 CHWs are being trained for providing it. He has led the designing of the training and training of national and state trainers in India.

They have established the famous community health care and research center 'Shodhagram' in the tribal area.

They also studied the problem of hidden child mortality in Maharashtra and subsequently launched a programme – Ankur – to reduce child mortality in the State.

They have led a campaign against alcohol which led to introduction of prohibition in Gadchiroli district, and influenced the State policy.

He has written 2 books of which *ek khalish gh x* is extremely popular in Maharashtra. It has received the State literary award.

Both of them are members of the National Commission on Population, Govt. of India, and several national and international committees.

Recently both of them were honoured with the highest honour of the state government 'Maharashtra Bhushan'.

The TIME magazine selected them as the 'Global Health Heros' (2005)

The major research includes

1. The first ever community-based estimate of the magnitude of gynaecological problems in rural women (1989) which paved the way for the international policy shift to women's reproductive health.
2. Developing surveillance system to record births and deaths, and determine causes of death in children.
3. Field trial of ARI control by using VHWs and TBAs (1998-90)
4. Developing a simple device – Breath Counter, to enable illiterate TBAs diagnose pneumonia in children. (1990)
5. Participatory action-research against alcohol leading to a mass movement and change in the government policy. (1988-93)
6. Studies on reproductive health problems in males (1992-95).
7. Studies on burden of health problems in home-cared neonates (1995-96).
8. A five year field trial of home-based neonatal care to reduce neonatal mortality (1993-98).
9. Two year longitudinal multisite study of child mortality in Maharashtra (1998-2000).
10. Multisite replication of Home-based Newborn Care (2001-2006)
11. Prevalence of tobacco consumption and household expenditure in Gadchiroli (2009-10)
12. Community-based estimation of the burden of back pain and pain in musculo-skeletal system (2009-10)
13. Field trial of Home-based maternal care (2008-11)
