Wealth Index for Household in 230 Villages in Dhanora Census 2024

The Wealth Index (WI) is a measure a households' cumulative living standard. It is calculated by using wealth score¹ obtained for each household. The wealth score is weighted sum of indicator variable to each asset (television, bicycle, water access and sanitation facilities etc.). Households are placed on a continuous scale of wealth score and separated into five wealth quintiles to compare the influence of wealth on living.

Table 24. Standard of living index score for households in 230 Villages in Dhanora Census 2024
